Welcome letter

Dear Colleagues,

Breast surgery is a field that continuously evolves, presenting both challenges and opportunities for those dedicated to advancing patient care. In this dynamic landscape, staying current with the latest techniques and best practices is essential. That is why we are excited to invite you to the **Bucharest Breast Meeting 2025**, an event designed to bring together experts and emerging talents for an immersive educational experience.

Scheduled to take place from **May 8th to 10th, 2025**, at the **Pullman Hotel, Montreal Square No. 10** in the heart of Bucharest, our meeting offers a comprehensive program that includes innovative sessions on video-assisted mastectomy and immediate breast reconstruction techniques, an advanced cadaver workshop on breast reconstruction after mastectomy, and a multidisciplinary roundtable conference addressing the latest trends in managing breast cancer.

We are honored to welcome two esteemed plastic surgeons as our special guests: **Dr. Burcu Çelet Özden** from Istanbul, Turkey, and **Dr. Barbara Cagli** from Rome, Italy. Their extensive experience and willingness to share their expertise promise to enrich our discussions and inspire surgeons at every stage of their careers.

At the Bucharest Breast Meeting 2025, we believe in the power of empathy and generosity—sharing knowledge to empower the next generation of surgeons. Along with expert-led sessions, this event offers an excellent opportunity to network with professionals from around the globe, exchange innovative ideas, and forge lasting relationships that will shape the future of breast surgery.

Hoping to see you in Bucharest!

Warm regards,

Prof. Dr. Zorin Crăiniceanu, Assoc.Prof. Dr Laura Răducu,

Assoc.Prof. Dr. Adrian Daniel Tulin, Prof. Dr. Cristian Radu Jecan.

Scientific Directors, **Bucharest Breast Meeting 2025**

Industry sponsored sessions

8th ◦ 9th May

Video-assisted mastectomy and immediate breast reconstruction

Video-assisted mastectomy and immediate breast reconstruction is an advanced surgical technique that combines minimally invasive methods with breast reconstruction in a single procedure. Using a video-assisted approach, surgeons can perform the mastectomy through smaller incisions, minimizing tissue damage and improving cosmetic outcomes. Following the removal of breast tissue, an implant is placed to restore breast shape, offering both physical and emotional benefits to patients. This approach reduces overall recovery time, enhances aesthetic results, and helps preserve the natural contours of the breast.
